Cybersecurity, Privacy & Critical Infrastructure

# OFFENSIVITY

# Situation

1 2016: 6.447  
VULNERABILITIES

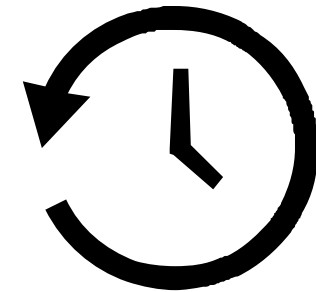

2 2017: 14.756 VULNERABILITIES  
+120 %

3 2018: ?  
+ ??? %

Daily 40 new security  
vulnerabilities in 2017

Software developers lack  
time & resources

No continuous monitoring &  
bad security

Dramatic risk reduction by  
automatizing security

Continuous monitoring for  
production & security checks for  
every new deployment

**SOFTWARE IS  
EATING THE WORLD.**

**offensivity**

Security solutions  
are so expensive...

We make security available  
for all platform operators  
and developers!

This also includes  
competitive pricing.

Helping developers  
to deploy secure applications
